

Health Canada approves the American Growth Hormone secretagogue – Secretropin, for entry into Canada with issuance of its own Product License Number.

February 24th, 2014: Encino, California and Toronto, Canada. Following in the footsteps of a thirteen year run of success with the 100% natural growth hormone secretagogue, Secretropin® has now crossed the border from the United States into Canada thanks to the efforts of Dr. George I. Traitses.

On January 20, 2014, after nearly more than two years of applications including supportive scientific data and clinical studies, Health Canada has issued registration number **NPN 80047690** for the distribution and sale of Secretropin® to Dr. Traitses under his company Secretropin Canada.

Secretropin (SRx) was originally developed by the Millennium Health Centers, Inc. to provide a safe, cost-effective, and legal alternative to injectable growth hormone for healthy individuals with low to low-normal growth hormone levels (based upon serum GH, IGF-1 and IGFBP-3 levels). Secretropin® was originally released in the US in 2001 as a non-peptide secretagogue that was clinically found to increase the production and release of Growth Hormone. In 2006, Secretropin, due to its ability to increase human growth factors from 20-650 percent became a physician-only dispensed product. To date, active studies continue to monitor Secretropin's ability to raise base-line hormone levels when used properly.

Secretropin® will be available from healthcare providers and soon from designated pharmacies throughout Canada. Individuals interested in obtaining Secretropin® should contact Dr. Traitses through his website www.secretropin.ca, while parties interested in becoming Canadian National Distributors should contact Millennium Health Centers, Inc. at Secretropin@gmail.com.
